

CLAIMS

What is claimed is:

1. An infant bath support system, the system comprising:

an infant bathing means;

5 a water basin; and

a housing adapted to attach the infant bathing means to the water basin via
a fastening means.

2. The infant bath support system of claim 1 wherein the housing is a mold
10 generally representing an object.

3. The infant bath support system of claim 2 wherein the object is an automobile.

4. The infant bath support system of claim 2 wherein the object is an insect.

15 5. The infant bath support system of claim 2 wherein the object is an animal.

6. The infant bath support system of claim 1 wherein the housing comprises ABS
plastic.

7. The infant bath support system of claim 1 wherein the fastening means is at least one suction cup.

8. The infant bath support system of claim 1 wherein the infant bathing means is a bathing station for securing an infant within a water basin.

9. The infant bath support system of claim 1 wherein the infant bathing means is a bathing support for securing an infant in a generally horizontal position within a water basin.

10. The infant bath support system of claim 1 wherein the infant bathing means is a bathing chair for securing an infant in a generally sitting position within a water basin.

11. An infant bath support system, the system comprising:

an infant bathing means;

a water basin; and

a housing enabled to receive at least one entertainment accessory and
5 adapted to attach the infant bathing means to the water basin via a fastening
means.

12. The infant bath support system of claim 11 wherein the housing is enabled to
collapse via at least one hinge such that its sized is reduced when stored.

10 13. The infant bath support system of claim 11 wherein the housing comprises of
at least two components enabled to removably attach when in use and removably
detach when stored, such that when detached the housing size is reduced and each
individual component is easily stored.

15 14. The infant bath support system of claim 11 wherein the entertainment
accessory is a mirror.

20 15. The infant bath support system of claim 11 wherein the entertainment
accessory is a wheel enabled to rotate around a central axis.

16. The infant bath support system of claim 11 wherein the entertainment accessory is a battery powered system.

17. The infant bath support system of claim 11 wherein the entertainment accessory is integrally formed within the housing.

5

18. The infant bath support system of claim 11 wherein the entertainment accessory is adapted to removable attach to the housing.

19. An infant bath support system, the system comprising:

an infant bathing means;

a water basin; and

a housing enabled to receive at least one entertainment accessory, and the

5 housing is enabled to collapse via at least one hinge such that its size is reduced
when stored and adapted to attach the infant bathing means to the water basin via
a fastening means.

20. The infant bath support system of claim 18 wherein the hinge is plastic.
